

# Quick Start Guide

Model: ATV40FHDC-1118

Hey!  
Let's get your new TV  
ready to use, fast!

## 1 Have you got everything?

See the inside flap of the box for how to handle the TV without damaging it!

You will also need:

- Phillips-head screwdriver
- Someone to help lift the TV

Unpack the box (be gentle) and make sure all of these items are there:

- |                                   |                       |                            |
|-----------------------------------|-----------------------|----------------------------|
| A. TV                             | D. Instruction Manual | G. TV Stands (2)           |
| B. Remote Control                 | E. Warranty Card      | H. Screws for TV Stand (4) |
| C. AAA Activ Energy Batteries (2) | F. AV Cable           | I. Quick Start Guide       |

## 2 Attach the TV stand

Unless you are wall-mounting the TV, you will need to attach its stand/legs. If you do want to wall mount the TV, see page 15 of the Instruction Manual.

Lay the TV face-down on a soft, flat surface (like the sofa, or a towel on a table).

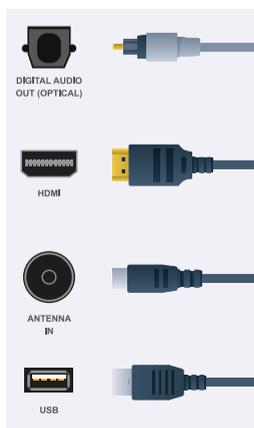

See the 'L' and 'R' markings on the stand? Match them to the 'L' and 'R' installation points on the underside of the TV.

Attach the stand to the TV at the installation points using the screws provided. (Grab a screwdriver for this bit).

This TV is heavy!  
We recommend asking  
someone to help you lift it.

## 3 Which plug goes where?

Want to hook up your new TV to a soundbar, gaming console or something else? The basic guide below shows what the plug and port should look like for different connections. You can find more of these on page 17 of the Instruction Manual. (These cables do not come with your TV, however we have included an AV cable for you.)

Use this to connect your soundbar, amplifier, digital receiver, or other external audio equipment.

Use this connection for a Blu-ray player, gaming console, computer and camera. (If your device doesn't have HDMI, you can use the AV cable provided with your TV.)

To watch free-to-air TV channels, you need an antenna connection.

Connect a USB device, or plug in your USB storage device to play its contents on your TV.

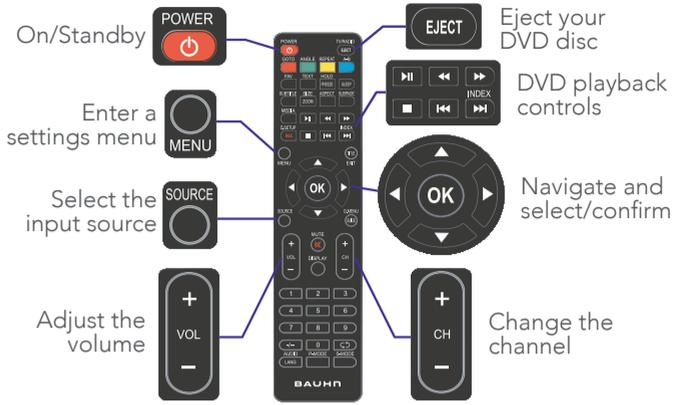

## 4 Get to know the remote

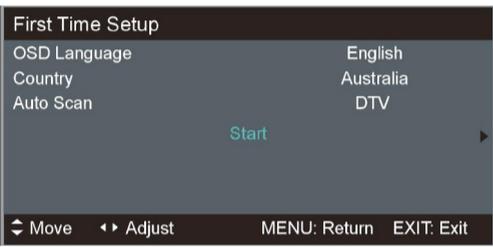

Point the remote control at the sensor on the TV

Familiarise yourself with the remote control - you'll be spending a lot of time together. Here are some of the buttons you'll be using most often.

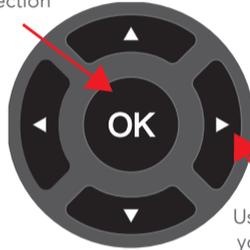

## 5 On-screen set-up

This TV is clever enough to scan and automatically tune to all available free-to-air channels. Easy!

Press to confirm a selection

Use to change your selection

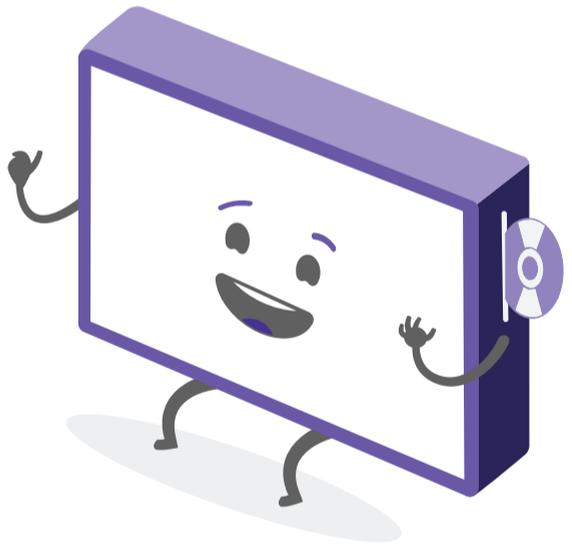

Once you've turned on your TV for the first time and you see the screen shown above, press the OK button on the remote control to start Auto Tuning all of the available TV channels.

## 6 Pop in a DVD!

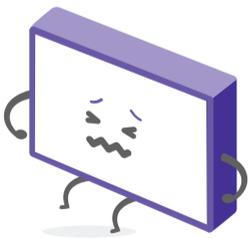

This TV has a built-in DVD player, making it super convenient to enjoy your DVD collection.

Insert your DVD, then press the SOURCE button on the remote (or the back panel of the TV) and switch the TV to DVD mode.

Simply use the DVD-related buttons on the TV remote to control playback!

Make sure that the mirrored side of the DVD is facing the front of the TV when inserting

## Uh-oh, this isn't right...

Set-up not going smoothly? We've got you! **We just need you to check a few things first:**

### Is it plugged in?

A new TV is exciting! So it's easy to forget something simple - like plugging it into the power outlet. Psst... make sure the outlet is switched ON.

### Look at the manual!

More often than not, the answer you need is right there in the Instruction Manual. The troubleshooting section on pages 54-55 may come in handy for tricky stuff.

### Ok, time to give us a call

What? The Instruction Manual didn't have ALL the answers? Speak to us! Call our **After Sales Support** on **1300 886 649**. Operating hours: Monday-Friday, 8:30am-6pm; Saturday, 9am-6pm AEST

Well done, you made it! Now sit back and relax... your new TV is automatically covered by a 1-year warranty. How nice!
