

Quick Start Guide

Model: ASBWS-0419

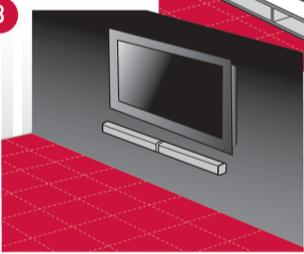

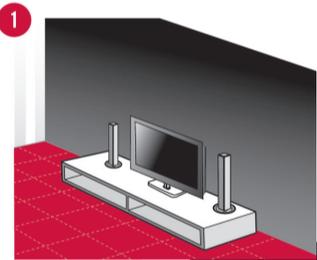

Hey!
Let's get your new soundbar ready to use, fast!

1 Have you got everything?

Unpack the box (be gentle) and make sure all of these items are there:

- | | | |
|-----------------------|---------------------------------|-----------------------|
| A. Soundbar | E. Stands (2) | I. Rubber feet (3) |
| B. Wireless Subwoofer | F. RCA to 3.5mm AUX cable | J. Instruction manual |
| C. Remote Control | G. 3.5mm AUX to 3.5mm AUX cable | K. Warranty card |
| D. Wall Brackets (2) | H. AC Power Adaptor | L. Quick Start Guide |

2 How to install

Display and use your soundbar in a way that suits your space, with these different installation options:

Pair of towers

Attach a stand to each of the two separate pieces and twist to secure.

Horizontal bar

Align the two separate pieces and twist to secure. Apply the rubber feet to the bottom of the unit.

Wall mounted

For detailed instructions on wall mounting the soundbar, please consult the instruction manual.

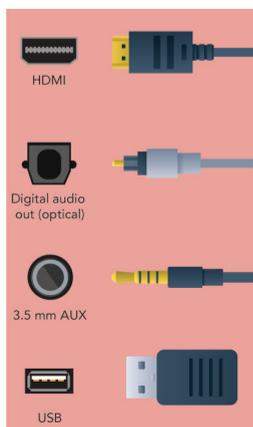

We recommend wall mounting to be done by a qualified professional. Incorrect installation could result in personal injury or property damage.

3 Which plug goes where?

Want to hook up your new soundbar to your TV? Use the basic guide below to see what the plug and port should look like for different connections. You can find more details on these on page 12 of the Instruction Manual.

(Not all cables come with the soundbar, however we have included a AUX and AUX to RCA cable for you.)

Use HDMI to decrease clutter and for high quality audio. Make sure you enable ARC on your TV in order to use this.

Use an optical cable for an easy connection with high quality audio capability.

Use an AUX cable for an easy connection with standard quality audio capability for TV and other audio devices.

Connect a USB device, or plug in your USB storage device to play its contents.

Nearly done! Just a bit more on the other side of this page...

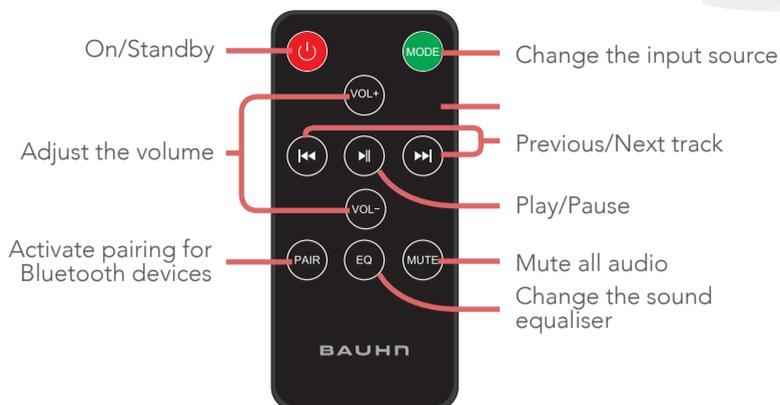

4

Get to know the remote

Familiarise yourself with the remote control - you'll be spending a lot of time together.

This remote likes to be pointed at the sensor on the soundbar in order to work properly!

5

Using your soundbar

Press the POWER  button to switch the unit ON.

Press the MODE button on the unit repeatedly or the relevant button on the remote to switch between HDMI (ARC), AUX, Optical, USB and Bluetooth® modes.

Press the EQ button on the remote to select the best preset equalisers for your audio: Standard, Movie (recommended for viewing movies) and Music (recommended for listening to music).

To pair your Bluetooth device with the soundbar, make sure the blue indicator light is flashing - this means the soundbar is in pairing mode. (If it's not, hold down the Bluetooth button on the remote until it does.) On your device, select 'ASBWS-0419' to pair with the soundbar and start streaming your music to it.

?

Uh-oh, this isn't right...

Set-up not going smoothly? We've got you!

We just need you to check a few things first:

U

Is it plugged in?

A new gadget is exciting! So it's easy to forget something simple - like plugging it into the power outlet. Psst... make sure the outlet is switched ON.

i

Look at the manual!

More often than not, the answer you need is right there in the Instruction Manual. The troubleshooting section on page 23 may come in handy for tricky stuff.

U

Ok, time to give us a call

What? You mean the Instruction Manual didn't have ALL the answers? Speak to us! We'd love to help you get up and running as quickly as possible. Call our **After Sales Support** on **1300 886 649**.

Operating hours: Monday-Friday, 8:30am-6pm; Saturday, 9am-6pm AEST

Your new Soundbar is ready to enjoy!

Well done, you made it.

Now sit back and relax... your new soundbar is automatically covered by a 1-year warranty. How nice!
